Subject: triennial review continuation (bacteria, cadmium, human health criteria) - Board memo & attachments
Attachments: Board_package_Final_10MAY2018.pdf; NOPC comment summary&responses_MAY2018.docx

As a member of the regulatory advisory panel you are receiving the Board memo and attachments sent to Board members in advance of their upcoming August 21 meeting to address proposed amendments to bacteria, cadmium, and 94 human health criteria. Comment pertaining to the amendments to be addressed at that meeting are in the Town Hall background document (Board memo - Attachment 4). Proposed ammonia criteria updates have been deferred to a separate rulemaking track and will be addressed at the December Board meeting. Comment and agency response to comment regarding ammonia criteria are attached as a separate document. The agency appreciates the input you provided during proposal development and continued participation in this and future rulemaking processes.
